

California  
SERIES

Fender®

THE SOUND THAT CREATES LEGENDS

*Fender California  
Series guitars  
are instruments  
of fine quality  
and outstanding  
craftsmanship*

---

## STRINGING

---

To fasten a string on the machine head and prevent slipping, follow the winding directions illustrated:

### Winding Direction

Left Side

Right Side

Be sure to allow enough slack so the string can wrap around the peg about three times before proper tuning is achieved. If you can lift the string about 3 or 4 inches from the fingerboard, at the middle of the neck when the string is first strung, there should be adequate slack for proper tightening.

Fresh strings add to the enjoyment and tonal qualities of your guitar. Change them often using Fender light gauge strings.

---

## TRUSS ROD

---

Each Fender guitar is carefully adjusted at the factory. The truss rod and string height are set for optimum action and playability with light gauge strings.

Under normal tension, the neck should have a slightly concave curvature. By creating a counteracting force, the truss rod prevents the neck from bending excessively under the stress placed on it by the strings. The tension on the rod is adjustable so the correct curvature can be achieved by regulating the neck's resistance to the string tension. Your Fender dealer is equipped to adjust the truss rod in the event such adjustment is required.

---

## CARE OF YOUR GUITAR

---

After you have finished playing, thoroughly wipe the entire guitar, including strings, with a clean, soft cloth. A regular routine for cleaning your instrument with Fender polish is recommended.

Avoid exposing the guitar to any chemical or substance that might mar the finish, as well as, to direct sunlight or other sources of excessive heat, humidity or shock.

It is important to avoid sudden changes in temperature since this causes the wood to expand faster than the finish which may result in checking. While the condition does not affect the tone, it does mar the appearance.

When storing the guitar for long periods of time, loosen the strings—but leave them attached.

*The pride of great guitar makers,  
such as Fender who creates fine electric guitars,  
require the best in materials and workmanship  
to adequately echo their achievements.  
The completely new Fender California series  
has been designed to reflect the  
freshness and character of the California style.*

---

We are pleased that you have selected one of our fine crafted Fender California Series guitars. They are a completely new line of acoustic guitars that feature the legendary Fender headstock. And these instruments are the result of extensive research and development, designed to give you a lifetime of musical enjoyment.

Each guitar is built by skilled and experienced craftsmen with the musician in mind. Carefully selected hardwoods are chosen for their distinctive beauty and ability to produce full rich tones.

The tops, on some models, are made of solid Sitka Spruce which produce clean, warm rich tones with exceptional brilliance and depth. On the backs and sides of selected models Rosewood is used for its beauty and warm, rich tone.

Fender California Series guitars are built to standards that reflect the high level of Fender quality. The result is an acoustic guitar with extraordinary sound, full projection, exceptional playability and beautiful appearance.
