

# THE FENDER® BASSMAN® 215 BASS SPEAKER ENCLOSURE

Your new Fender® Bassman® 215 Bass speaker enclosure is constructed from 3/4" (1.9 cm) 7-ply Birch Maple Plywood and is capable of handling up to 300 Watts of power. The Bassman 215 features two 15" (38.1cm) speakers with 56 oz (1.6 kg) magnets and is designed for use with the Fender 1200S, the Fender 300T or any other professional quality bass amplifier. In order to more fully understand the operational characteristics of your Bassman 215 Bass speaker enclosure, please read through all instructions and heed all caution and safety warnings on both your amplifier and Fender Bassman 215 Bass speaker enclosure.

## CONNECTING MULTIPLE 215 BASS SPEAKER ENCLOSURES

Because the Bassman 215 Bass Speaker Enclosure's jacks are wired in parallel, multiple 215 cabinets can be "daisy chained" together providing additional output for larger venues. To do so, simply connect them with standard 1/4" plug speaker cable (16 gauge or heavier) as shown below. *Note: If using a tube amplifier, your tube amp could fall into protect mode or even be damaged by using an improper impedance load. Therefore, it is important to heed all caution and safety warnings on both your amplifier and Bassman 215 Bass speaker enclosure.*

## SPECIFICATIONS

PART NUMBER	021-1674-010
DRIVERS	Two 15 " (38.1 cm) Steel Frame Woofers 2.5" (6.4 cm) voice coils 56 ounce (1.6 kg) magnets
CABINET	3/4 " (1.9 cm) 7-ply Birch Maple Plywood
SENSITIVITY	96 dB, 1 Watt - 1 Meter
POWER HANDLING	300 Watts
