Specifications are subject to change without notice.
Control Description

A) INPUT – Plug your guitar in here.
B) GAIN – Adjusts the distortion level and contributes to the overall loudness of the amplifier. Use in conjunction with VOLUME to adjust the overall loudness of the amplifier.
C) VOLUME – Adjusts amplifier loudness.
D) TONE – Adjusts the tone and brightness of the guitar input channel. 12 is the brightest setting, becoming progressively less bright as the dial is rotated towards 1.
E) POWER – Switches the Amplifier ON or OFF.
F) POWER INDICATOR – Illuminates when the amplifier is ON.

Side Panel Functions

G) HEADPHONE JACK – Connection for headphones. Using this jack automatically disables the internal speakers.
H) ---C+ DC 9V – 9V DC power adapter connection. Only use a safety certified external power adapter that is rated properly for use with this product.
