

# THE FENDER® FM 412 LOUDSPEAKER ENCLOSURE

Your new FM 412 loudspeaker enclosure features four 12" (30.5cm) speakers and is capable of handling 100 Watts. The FM 412 speaker was designed to complement the Fender® FM 100H amplifier, but it can be used with any 4-ohm, 100-watt instrument amplifier with a standard 1/4" speaker output jack. Read these instructions and your amplifier manual before making connections.

## Connecting the Fender® FM 412 Loudspeaker

Connect the FM 412 to the speaker output jack on your FM 100H amplifier with its included speaker cable or any unshielded, quality speaker cable.

When using the FM 412 with other amplifiers, check the amplifier output specifications for compatibility. Always make certain that the amplifier has a 4-ohm output impedance capability and the power output does not exceed 100 watts.

## SPECIFICATIONS

PART NUMBER	2317800000
DRIVERS	Four, 12" (30.5 cm), Special Design speakers
CABINET	18 mm plywood
SENSITIVITY	99 dB, 1 Watt - 1 Meter
POWER HANDLING	100 Watts
