Your new Fender Guitar incorporates the highest standards of craftsmanship and quality components. As a Fender Owner you can be proud and self-assured in the knowledge that you have the finest.

Your playing pleasure will be enhanced if you become thoroughly acquainted with all of the features of your instrument. Please read this instruction manual carefully and completely. If you need more information contact your authorized Fender Dealer.
BRONCO

MODERN HEAD DESIGN
Places keys on one side of head for easier tuning.

FAST ACTION NECK
Rosewood fingerboard on maple neck with adjustable truss rod for perfect alignment.

CUTAWAY BODY DESIGN
Permits easy playing of all frets.

ADJUSTABLE BRIDGE
Individual length adjustment for each string.

ADJUSTABLE PICKUP

OFFSET WAIST
Easier to hold in sitting position. (Patented)

VOLUME CONTROL

TONE CONTROL

Figure 1
BRIDGE ADJUSTMENT

There are two Hex-Head Height Adjustment screws as shown. Turning the screws clockwise lowers the bridge and turning them counterclockwise raises the bridge. Lower action makes for easier playing but if the strings are too low they will buzz on the frets.

Very Important: The Bridge Plate must always rest securely in the grooves under the heads of the two height adjustment screws (Figure 2). It will always maintain this position if the strings are replaced one at a time when restringing.

STRING LENGTH ADJUSTMENT

Each string passes over a slotted bridge section (Figure 2) which is held in place by a Phillips head screw. This screw must be loosened in order to adjust the bridge section and tightened after the bridge section is adjusted. If a string, played on the twelfth fret, sounds flat compared with the open string harmonic on the same fret, slide the bridge section forward (toward the neck) to shorten the string. If a string sounds sharp compared to the harmonic, slide the bridge section backward to lengthen the string.
TREMOLO LEVER
For optimum performance, the knob end of this lever should be parallel to the body when not in use. If necessary, adjust it by turning the Tremolo Adjustment screw in the proper direction. The position of the lever is determined by the tension of the strings; therefore changing to a lighter or heavier set of strings will change the position of the lever.

FIGURE 2
Bridge Section
ADJUSTABLE NECK TRUSS ROD
The Neck Adjustment Screw (Figure 3) is located at the body end of the neck. If the neck is bowed away from the strings the screw should be tightened (clockwise). If the neck is bowed toward the strings the screw should be loosened (counter-clockwise). Use a flat head screwdriver with a tip approximately 1/8” wide (too large a tip will damage the pickguard). Usually a quarter turn or less is required. While turning the screw it is helpful to apply pressure to the neck in the same direction as the required adjustment.

PICKUP
There are two height adjustment screws, one at each end of the pickup. Turn the screws clockwise to raise and counter-clockwise to lower the pickup.

Note: All parts must be purchased through an authorized Fender Dealer or Service Center. Fender Musical Instruments cannot accept orders direct from the consumer.
GUITAR THRONE
Fully adjustable, chrome plated durable stand with foam padded seat cushion. Adjustable heel rest. Back rest included.

HARD SHELL PLUSH LINED CASE
AMPLIFIERS

BRONCO AMPLIFIER
Popular "beginner" amplifier at a very popular price.
- Heavy duty wide-range 8" speaker.
  Rugged construction.

VIBRO CHAMP
Ideal choice for students or beginners.
- Heavy-duty, wide-range 8" speaker.
WARRANTY

Fender Musical Instruments warrants this product to be free from defects in materials and workmanship for a period of one year from date of purchase. The warranty herein extends only to the original purchaser at retail of a new product. This warranty shall not apply to products purchased from anyone other than an authorized Fender dealer, or to products which have been subject to alteration, misuse, accident, neglect (such as extremes of temperature and/or moisture), or to wear resulting from normal usage.

The warranty herein becomes effective upon receipt of the completed attached owner registration card within ten (10) days after date of purchase. Upon its receipt the owner will be sent a personalized Fender warranty identification card. Presentation of the card within the warranty period will entitle the owner to receive authorized service and repair from any authorized Fender dealer. Such service and repair shall include all labor and materials necessary to make the repairs and replacements covered under the terms of this warranty.

If the product must be returned to the factory service center for repair, it must be accompanied by an authorized Fender dealer's written direction to such effect and a Fender shipping label. Transportation charges to and from the service center shall be borne by the owner unless otherwise specified by law.

This warranty is expressly in lieu of all other agreements and warranties, express or implied, except as may be otherwise required by law.
WARRANTY REGISTRATION CARD
BRONCO

The Fender warranty becomes effective only if this card is returned to Fender Musical Instruments within ten (10) days after purchase. It should be filled out, signed, detached, and mailed immediately. Upon receipt of this card, you will be mailed your Fender-owner identification card.
