

Your Fender® Aerodyne® Special electric guitar or bass is equipped with a Babicz® Full Contact Hardware bridge for great tone and playability.

Adjusting Your String Action Height:

- 1) Install string (A) by positioning it in the groove (B), found in each eCAM saddle (C).
- 2) Using the provided hex wrench (2mm for bass, 1.5mm for guitar): loosen screw (D), then set your string height by turning screw (E) until the desired string height is achieved.
- 3) Lock the eCAM saddle (C) by turning screw (D), using the provided hex wrench.

Adjusting Your Intonation:

Using a phillips screwdriver (not included), turn the Intonation Adjustment Screw (G), until the desired eCAM Saddle Housing (H) position is achieved.
