

# Amperstand Guitar Cradle

## Owner's Manual

## **Amperstand Guitar Cradle**

The Amperstand Guitar Cradle transforms any amplifier or tabletop into the perfect place to set your guitar down without fear that it will fall. The bottom of the Amperstand Cradle is covered in a micro suction material that will safely grip just about any surface, including amplifier tolex, creating a secure seal that will hold the cradle in place to give you peace of mind. The Amperstand Cradle also provides a classic Fender "ashtray" to conveniently hold small items like picks and a capo – or your favorite beverage. The two grooves on the sides will hold your guitar cable in place.

This product has been tested with many finishes and no problems have been found. Nonetheless, please exercise caution when placing vintage instruments or instruments with nitrocellulose finishes on this stand, as sweat and other environmental contaminants can produce chemical reactions between the finish and stand components that can be neither predicted nor tested.

### Directions:

- Remove protective film that covers the microsuction material
- Slide vertical face into tray as illustrated
- Clean amp or tabletop with damp cloth and dry
- Align vertical face with amp or tabletop and rock into place
- Push down for 10 seconds
- Lean your guitar against the cradle and you're all set

Your Amperstand can be used on various surfaces and is easy to move back and forth between multiple locations. To remove, grab and peel slowly.

Note that if the microsuction material loses some of its suction, just wipe it with a damp cloth to remove the dust and allow to dry and it will be as good as new.

The Amperstand Guitar Cradle performs best with non-offset instruments.
